LIGHT WEIGHT ELECTRIC IRON

OPERATION DRY IRONING

- Keep iron on heel rest insert plug pin in wall socket & make mains supply 'ON'.
- Set Temperature regulating knob for desired fabric (. / . / . / . . .) & Indicating light will glow. Wait for indicating light to go off.
- This Indicates that iron is ready for ironing since desired temperature is achieved.

* Read this garment lable and follow the manufacturer's ironing* instruction that are often shown by symbols similar to the following

	Synthetic, Nylon	MIN	MIN
	Silk, Polyster, Rayon	•	I
	Wool	• •	II
	Cotton	• • •	III
	Linen	MAX	MAX

Care Maintenance

- Before cleaning Remove the Plug from wall socket and allow iron to cool down Sufficiently.
- One can wipe it with damp cloth and then dry cloth. Do not use thinner /solvent for cleaning.
- Check regularly whether mains cord is safe to use.

Note

- Please ensure that while replacing power supply cord an insulation sleeve of fiber glass or equivalent material has to be used over & above cabel insulation.
- If the supply cord is damaged, it must be replaced by manufacturer, its service agent or similarly qualified person in order to avoid hazard.

POWER SUPPLY : 230 v 50 hz AC with Earthing
